Integration Paysolutions with Prestashop 1.6.xx

Paysolutions.co, Ltd.

522 Floor 3, Soi Ratchadaphisek 26, Ratchadaphisek Road, Samsennok, Huaykhwang, Bangkok 10310

Tel 02-515-2324 095-3722151, 095-3722152, 095-3722153, 095-3722154

Login to the admin panel and go to menu Modules-> Modules & Services

The screenshot shows the PrestaShop 1.6.1.17 admin interface. The left sidebar has a search bar and a list of menu items: Dashboard, Catalog, Orders, Customers, Price Rules, Modules and Services (highlighted), Shipping, Localization, Preferences, Advanced Parameters, Administration, and Stats. The 'Modules and Services' menu is expanded, showing sub-items: Modules & Themes Catalog, Positions, and Payment. The main content area is titled 'Dashboard' and features a date range selector (From 2017-10-24 To 2017-11-24) and a table of 'Currently Pending' items.

Currently Pending	
Orders	4
Return/Exchanges	4
Abandoned Carts	30
Out of Stock Products	6

Add a new module -> Choose files (Choose file paysolutions.zip) and then Upload this module

The screenshot shows the 'List of modules' page in PrestaShop 1.6.1.17. The left sidebar is the same as the previous screenshot. The main content area is titled 'List of modules' and includes a warning banner about configuration requirements for the 'paysolutions.zip' module. Below the banner, there is a section for 'ADD A NEW MODULE' with a file input field containing 'paysolutions.zip' and an 'Upload this module' button.

There are 2 warnings

===== DONE =====

In the Merchant Control Panel (<https://control.thaiepay.com>) configuration the post back URL and return URL

Return Parameter

After buyer completed the payment by credit card through 'THAIEPAY', system will display the payment result and return to your website page. You can set url and additional parameter values through this menu.

Post Back Url and Return Url Setting

You can set the Post Back Url and the Return Url including other parameter values through the form below.

⚠ Get to know before setting:
Actually, Post back Url and Return Url are quite different. Please read the items below.

- Post Back Url** is a url of website page which you use for sending parameter value to after payment has been done completely. Buyer will not see the sending process because it is a background process. But buyer will only see the result of payment if it has been through or rejected.
- Return Url** is a url which you use for redirecting to after payment has been done completely and after buyer clicked on [Return to Merchant Websites] button. Mostly, merchants set Return Url to redirect to their Home page. You should not use Return Url for sending any parameter values because not all buyers will click on [Return to Merchant Websites] button. Moreover, Return Url is a foreground process; buyer will see the sending process and may stealthily use programming technique to skip payment process.

Return Url:*	<input type="text" value="http://www.your-domain.com"/>
Status:*	Do you want to activate Post Back Url system? <input checked="" type="radio"/> Yes
Post Back Url:*	<input type="text" value="http://www.your-domain.com/modules/paysolutions/postback"/>
Main Parameter:*	Please select parameters which you want to receive after the payment has been completed in the boxes below. <input checked="" type="checkbox"/> refno (Parameter value "refno" is required and can not be deleted.) <input checked="" type="checkbox"/> merchantid <input checked="" type="checkbox"/> customeremail <input checked="" type="checkbox"/> productdetail <input checked="" type="checkbox"/> total <input checked="" type="checkbox"/> cardtype (V: VISA, M: MasterCard, A: AMEX, B: Billing)
Additional Parameter:*	You can set name and value of the additional parameter. Name: <input type="text" value="Completed"/> Value: <input type="text" value="1"/>
<input type="button" value="Submit"/>	

Configuration	Example	Description
Return Url	http://www.your-domain.com	Return Url is a url which you use for redirecting to after payment has been done completely and after buyer clicked on [Return to Merchant Websites] button.
Post Back Url	http://www.your-domain.com/modules/paysolutions/postback.php	Post Back Url is a url of website page which you use for sending parameter value to after payment has been done completely on background system.
Additional Parameter	Name = Completed Value = 1
